Low Profile Cart *(for stacking pallets)*

Although our stacking pallet racks are easily movable by forklift, sometimes it is easier to fit them in tight places when they are on wheels. Therefore, we offer a simple, low-profile cart specifically designed to accommodate our racks.

Our stacking pallet racks shown as reference. These are a great solution for improving organization while boosting efficiency and opening up valuable floor space

Funnels locate stacking pallets for easy, efficient alignment

Round pins fit inside upright tubes of stacking pallets to secure their positioning

2x swivel casters in line with foot brake

2x rigid casters for effective steering

X/Y dimensions are customizable to accommodate the size of your stacking pallet racks.

4x ϕ 6" phenolic casters
