

HEAVY GAUGE PALLET CART

WIP/Component Staging

Are your parts staged on static tables? How frequently do your work cells change setups and configuration? In today's world, mobility and adaptability are paramount to success.

ALWAYS MOBILE, ALWAYS ERGONOMIC

Apply the "3-cart Rule" for most work stations

1. Pre-op components; being pulled from
2. Post-op components; ready to roll out
3. Next-job staged; in place & to roll in

Always circulating from one stage to the next.

Most commonly designed to stage a standard 40x48 pallet
